

OUR SUSTAINABLE JOURNEY

FOOTPRINT REDUCTION

Aztec prioritizes waste reduction throughout production, in January 2022, Aztec partnered with Aluvision, investing in LED panels and modular framework systems, that will last over 20 years, to reduce waste and aim for full timber-free operations. We advocate for reusable fabric prints, cardboard furniture, and dissuading single-use props/materials. We also review equipment purchases to minimise our carbon footprint, prioritising repair and repurposing when feasible.

CARBON CALCULATIONS

Aztec has been working tirelessly to make available to their clients a greater understanding of their event carbon metrics. We are one of the very few companies in our field that are able to provide accurate calculations. Knowing your carbon footprint is only part of the journey but we work alongside our clients to help reduce single use items and we ensure our scenic solutions are composed of elements that can have an onward life or can be repurposed or recycled. We can also work with you to assist offsetting your carbon emissions if this is something you need support with. We work alongside accredited organisations if you would like us to arrange this for you.

Our carbon calculations are broken down into 3 core areas

OUR EVENT TECHNOLOGY - emissions from use of the physical technical hardware during the event - Provided pre-event

OUR EVENT LOGISTICS - emissions from our actual event haulage, getting the equipment to/from your chosen venue/location.- Provided pre-event

OUR CREW MOVEMENTS - emissions from getting technical crew to/from the event - Provided post-event

ACCREDITATIONS & CERTIFICATIONS

ESSA ACCREDITED MEMBER

Aztec has been an early adopter of sustainable practices and equipment. Proudly accredited by ESSA, for Health & Safety and we have now achieved TIER 5 status for Sustainability two years running becoming the first audiovisual company to do so.

ISO CERTIFICATION

Our commitment to top-tier sustainability continued with the renewal of our ISO certifications in September 2023.
